CRUISE IN THE ❤️ OF THE MEDITERRANEAN

Grimaud could be summed up. The village of Grimaud reflects a long history that began with the Gallo-Roman period. In the eleventh century, its rocky outcrop attracted the attention of the strategists due to the fact that it was situated on a high hill peak, dominating the Gulf of Saint Tropez and controlling the access from the North and from the Maures mountains.

It is in the heart of the lake dwelling city of Port Grimaud, often called the Venice of Provence, that you can board FEEL for a few days or a few weeks.
